

Bytown Woodturners Presents:

David Bell

May 27-28, 2023

Combining Resin and Wood

Accomplished demonstrator and woodturner Dave Bell will walk you through the safe handling and use of materials, equipment and tools, the theory of resin casting with Alumilite and Epoxy as well as stabilizing with cactus juice prior to casting. Dave will demonstrate the preparation of materials, basic mold making, and turning a final project on a wood lathe. Turning tool selection with HSS and carbide will be discussed and demonstrated.

Dave will prepare and cast resin with wood to create a combined resin and wood hollow form. Casting resin will also be completed to form other useful pieces to make handles for various other projects.
